1. What is an Apprenticeship?

Apprenticeships are nationally recognised, work-based training programmes designed around the needs of employers to facilitate the development of practical, job specific skills by allowing inexperienced individuals to work alongside more experienced staff.

Statistics released by the Department for Business, Innovation and Skills (2013) indicate that in 2011/12 Apprenticeships starts increased by 13.9% compared to the previous year.

This increase can be attributed to the Government as they continue to place emphasis on using Apprenticeships to combat unemployment and boost the UK's ability to compete in global markets.

By completing an apprenticeship, individuals gain a qualification that is valued by employers and enhances their prospects for career progression in the future.

According to the National Apprenticeship Service (2013), an apprenticeship can take between one and four years to complete depending on the level of the Apprenticeship, the individuals' ability and the industry in which they are based.

Due to the time it takes to complete an apprenticeship, individuals have the opportunity to earn a wage (the minimum salary is £2.68 per hour), while working to gain job-specific skills. Employers therefore use apprenticeships to train both new and existing employees who are moving into a new or changed job role and need to learn new skills.

1.1 What does an Apprenticeship involve?

Apprenticeships are designed with input from employers in the industry sectors, and offer a structured programme that takes individuals through the skills they need to undertake their job to a high standard. The Government covers a proportion of the cost associated with training apprentices; however, this is dependent on the age of the apprentice and employers are responsible for paying their apprentices wages.

The majority of the training is 'on-the-job' at the employer premises working alongside experienced staff, while the remaining training is delivered 'off-the-job' by a specialist training provider – usually on a day or block release basis. A paper by Asset Skills (2011) suggests that individuals looking to apply for an apprenticeship placement in today's competitive market would benefit from having a range of skills and attributes, including:

- Confidence
- Interview skills
- Communication skills
- Problem solving skills
- Independent and team working skills
- Basic literacy, numeracy and IT skills

2. Industry Overview

2.1 Definition

Facilities management is a relatively new sector that focuses on the co-ordination of services related to the operation of commercial or institutional buildings. This will typically include activities such as:

- Procurement and contract management
- Building and grounds maintenance
- Security
- Cleaning
- Health and safety
- Energy management
- Space management
- Catering

2.2 The industry's role in the UK economy

The facilities management industry is relatively new, but in recent years it has matured and has been able to demonstrate its value to businesses by providing an efficient method of managing non-core activities (Facilities Management Journal, 2013). In 2012, the UK facilities management industry was valued at £106.3 billion.

This is expected to increase by £10.7 billion to £117 billion by 2017 due to new growth opportunities created by the popularity of outsourcing key support services through bundled and integrated contracts that enhance core services by adding value (Facilities Management Journal, 2013; Facilities Management Magazine, 2013) – Market and Customer Insight (MCI) (2013) estimate that demand for contracted services will increase by 9% between 2012 and 2017.

2.3 Employment

Evidence suggests that this growth, particularly in sales, will contribute to the creation of new jobs in the sector with 72% of the facilities management companies recently surveyed stating that they would recruit new employees (FM World, 2013).

There are currently a total of 207,800 people employed in the facilities management industry across Great Britain. London accounts for the highest proportion of facilities management employees in England (29%), followed by South East (13%) and the West Midlands (13%).

3. Entry Requirements

3.1 Apply for an Apprenticeship

Apprenticeships are an established route for new people to enter their chosen field of work by easing the sometimes difficult transition between full-time learning and employment. They also provide more experienced staff with the opportunity to develop their existing skills or re-train so that they can enter new industries.

Anyone living in England, over 16 years-old and not in full-time education can undertake an apprenticeship that takes between 1 and 4 years to complete depending on level. A paper by Asset Skills (2011) suggests that individuals looking to apply for an apprenticeship placement in today's competitive market would benefit from having a range of skills and attributes, including:

- Confidence
- Interview skills
- Communication skills
- Problem solving skills
- Independent and team working skills
- Basic literacy, numeracy and IT skills

3.2 Progression route

Apprenticeships can lead to:

- Permanent employment
- National Vocational Qualifications (NVQs) at Level 2,3,4 or 5
- Functional Skills qualifications, e.g. in maths, English or ICT
- a technical certificate, such as a BTEC or City & Guilds Progression Award
- knowledge-based qualifications, such as a Higher National Certificate (HNC), a Higher National Diploma (HND) or a Foundation degree

4. Level 2 Apprenticeship in Facilities Services

4.1 Who is it for?

This apprenticeship programme has been designed for people working in the following occupations roles:

- Trainee / Facilities Assistant
- Caretaker
- Cleaning Services Team Leader

4.2 What does it cover and how will I learn?

The apprenticeship programme in Facilities Services at level 2 has been designed and developed to attract new entrants into Facilities Services and to enable the up skilling of the existing workforce to progress and develop within the job role.
