About CIWM and this Handbook

About CIWM

CIWM is an awarding organisation and charity that develops qualifications for those working in cleaning, street cleansing, facilities management, resource management, recycling and parking from operative through to management level.

As the leading professional body for resource and waste professionals, CIWM (Chartered Institution of Wastes Management) is the voice of the sector and represents over 5,500 individuals in the UK and overseas.

CIWM has a unique understanding of the sector. Our professional knowledge and trusted reputation enables us to inform and influence legislation and policy, playing a vital part in shaping the future role and reputation of the sector.

Equal Opportunities

CIWM supports the principles of equal opportunities, and we are committed to meeting these principles in the provision of all our qualifications and assessments. We firmly believe that all learners and stakeholders are therefore entitled to receive equal treatment irrespective of age, sex, race, marital status, religion, disability, or sexual orientation.

The Purpose of this Qualification Handbook

Welcome to your CIWM Qualification Handbook. This will help you to complete your qualification. It contains:

- The units you need to achieve to complete your qualification.
- Information about your responsibilities as a candidate.
- Reference information covering each learning outcome and assessment criteria.

Frequently Asked Questions

What is a regulated qualification?

A regulated qualification demonstrates that you have the knowledge, skills and/or understanding to meet the standards expected by employers in your industry. Your qualification is recognised by CIWM and one or more of the educational regulators across the UK.

What is the objective of this qualification?

This qualification has been specifically developed for those who work or want to work in an office based parking role within the UK private or public parking industry. You will develop the knowledge and skills required for employment and progression within this vital industry.

Who is it for?

- New entrants to the industry
- Experienced workers seeking a formal qualification

What are the entry requirements of this qualification?

This qualification is open entry. This means that learners interested in undertaking this qualification do not require any other qualifications or levels of attainment in order to take this qualification.

What job role could this qualification lead to or support?

This qualification could have significant benefits for the parking workforce as it will act as a gateway for opportunities for career

progression or further education by building the confidence of employees and demonstrating that their skills have value.

The UK parking profession employs approximately 82,000 people (with 87% of these people employed in the private sector) in a wide range of occupations, compared to 569,000 people across Europe. This qualification is ideal for those employed in the following job roles:

- Notice Processors
- Notice Processing Officers

Effective traffic and parking management is essential to support the sustainable growth of the UK economy as there are currently 34.5 million licensed vehicles on the roads (Juggins, 2013). Most of these vehicles spend more than 90% of the time in a car park, on the side of the road, at a station or in a garage (Juggins, 2013).

What do I need to achieve?

To achieve this qualification, you will need to complete the mandatory unit and select an optional pathway.

Mandatory Units

Introduction to Notice Processing and Information Management (L3NP1)

NPA3 Optional Group 1 (England, Wales & Northern Ireland)

Process Penalty Charge Notices and Respond Appropriately to Challenges, Representations and Appeals (L3NP2)

NPB3 Optional Group 2 (Scotland only)

Process Penalty Charge Notices and Respond Appropriately to Challenges, Representations and Appeals (L3NP3)

NPC3 Optional Group 3 (England & Wales)

Notice Processing Requirements for parking enforcement on Private Land (L3NP4)

NPD3 Optional Group 4 (Scotland & Northern Ireland)

Notice Processing Requirements for parking enforcement on Private Land (L3NP5)

What is a unit?

The units of a qualification describe what you must be able to do and understand to perform work activities competently in your job role.

- Learning outcomes: describe what tasks you will be able to do as a result of learning.
- Assessment criteria: describe what activities you will need to do and what you must know to complete each task.

What is a CIWM (WAMITAB) Qualifications Centre?

You will gain your qualification through a CIWM (WAMITAB) Qualifications Centre. It may be your place of work, a local college or training provider. Assessment of your qualification will be carried out at your place of work and the centre is responsible for the administration. Centre staff will therefore:

- Register you with CIWM.
- Provide a registration number.

- Apply for your certificate when you have completed your qualification or units.

How long will it take?

You have two years to complete your qualification from the date of registration, but your centre may have some requirements that they will explain to you.

Who will help me achieve my qualification?

The following people at the CIWM (WAMITAB) Qualifications Centre will help you to achieve your qualification:

What are my responsibilities as a learner?

You will need to:

- Provide your centre with your personal details so they can register you with CIWM.
- Participate in any training provided.
- Undertake the assessment.
- Comply with health and safety law and regulations.

How is this qualification assessed?

The following list represents a range of possible assessment methods but it is not exhaustive or prescriptive, and Centres may use any suitable method of assessing candidates' performance.

Case Studies - There are numerous types of case study that can be used, in a variety of environments, and all should allow the candidate to replicate a real-life scenario and produce appropriate outcomes.

Replication / Simulation - Replication or simulation of a business scenario can be a practical and effective tool for establishing skills and understanding where naturally occurring evidence is unavailable or infrequent. This is typically the 'last resort' option for assessment but is warranted where certain considerations apply;

- Health and safety considerations
- Infrequently occurring activities
- Activities that would cause serious inconvenience or loss to an employer
- Equality of access

Where centres use such an approach, the replication should offer a realistic working environment where the skills to be assessed are normally employed. Simulations can have high realism and authenticity but the utility may be poor.

Presentations - Candidates may present the results of some elements of their work to the assessor or to a wider audience. Questions asked by the audience can provide a further opportunity to test understanding. Presentations can also demonstrate competence in areas where communication skills are being assessed but it is important to ensure that assessment is strictly in accordance with the requirements of the standards, and that a candidate's lack of presentational skills are not allowed to influence the assessment of outcomes to which they are not relevant.

Assignments - Candidates may undertake assignments either individually or as part of a group. The evidence from an individual assignment can readily be assessed but where group assignments are used the assessor should only accept evidence that can be attributed directly to candidates.

Time-Constrained Tests - Time-constrained tests may be used for the assessment of the outcomes. Such tests should be taken under supervised examination conditions using either conventional or technology-based techniques. These could include short answer or essay questions.

- Unseen, closed-book, examinations have a high utility and very high authenticity but poor realism.
- Open-book examinations improve on realism by making available standard reference sources for candidates to consult. Where this is used, expectations about what constitutes a satisfactory level or performance must be raised accordingly.
- Pre-circulated case studies with unseen examinations allow candidates three to six weeks to consider a case study in their own time and make notes. These notes may be taken into the examination room and referred to by the candidate when answering the unseen examination questions.

Work-Related Technical Projects

A work-related technical project could be acceptable for assessment provided that the employer requirements match the Learning Outcomes for the Unit. The project should be based on current issues relating to the work of the individual and be in line with employer needs. In addition to the formal assessment process, an important element of the assessment would be employer feedback on the project.

Assessment in the Workplace

The candidate's normal work activities may be able to provide evidence of at least some of the required outcomes and as a method

of assessment has a high utility, at least as far as the candidate is concerned.

- Direct assessor observation where a required outcome can be covered by workplace observation there is no reason why it should not be. As an assessment method this rates highly not only for utility but also for realism and authenticity.
- Normal outputs from work activities in the form of reports, minutes of meetings, etc may also be used to provide evidence. While this scores highly for utility and realism, appropriate steps must be taken to ensure authenticity, especially where reports, etc are produced by a team.

If these methods are used there must be a written statement by the assessor listing the outcomes demonstrated and the criteria used to assess effective performance.

Professional Discussion - Provides a holistic approach to assessing knowledge and understanding and is useful in determining not only what and how a candidate is performing, but also their analytical and decision-making abilities. As an assessment method, it can be one of the best ways of testing the validity and reliability of a candidate's evidence. However, it is important to bear in mind that professional discussion it is not a question-and-answer session and does not replace other stated methods of assessing candidate performance; rather it is a useful addition to an overall methodology. This should be done in three phases:

- **Planning the discussion:** The assessor needs to be clear about the purpose of using professional discussion and the required outcomes in the early stages of planning.
- **Facilitating and assessing the discussion:** The assessor's role is to manage the process in order to allow their candidate to prove their knowledge and understanding in a supported environment but without the assessor constantly directing and leading the conversation. During the discussion, the assessor may use a number of techniques to ensure the discussion remains focused and effective – i.e. periodically summarising points covered, questioning to probe for more information or to clarify certain points of discussion.
- **Recording Evidence:** A record of the discussion should be produced to show how the assessment criteria have been covered. There are various options for recording professional discussion; audio or video taping or paper based logging. If using an audio/video tape, it is important to agree this with the learner first to ensure they are comfortable with this method of recording. Whatever recording method is selected, the assessor needs to ensure that the evidence resulting from discussion is clearly referenced to the appropriate assessment criteria. This is important to enable effective verification.

Oral Examination - There is no single blueprint for oral examinations, but standardisation of the interview procedure is needed to ensure reliability and validity (Brown, 2001:12) whilst there also needs to be protection against the content of the questioning being compromised after the first students leave the examination.

As such, CIWM expects that this method of assessment is used primarily to overcome literacy issues which may disadvantage those learners who would otherwise be required to sit a form of written examination. As with Professional Discussion, A record of the discussion should be produced to show how the assessment criteria have been covered and the assessor needs to ensure that the evidence resulting from discussion is clearly referenced to the appropriate assessment criteria. This is important to enable effective verification.

Useful Words

| Instructional verbs | Definition |
|--------------------------------------|--|
| Assessment Criteria | These specify the standard that you are expected to meet to demonstrate that you have achieved the Learning Outcome. Assessment criteria are detailed enough to allow judgments to be made about your competence. |
| Awarding Organisation | To have a qualification recognised in the UK it must be accredited through an awarding body. These organisations are regulated by Ofqual in England, Qualifications Wales, CCEA in Northern Ireland and SQA in Scotland to ensure that you receive a high quality, recognised qualification upon completion of the course. |
| CIWM | An Awarding Organisation for a wide range of qualifications in waste management and recycling, cleaning and street cleansing, facilities management, and parking. CIWM is responsible for ensuring the on-going quality of the delivery and assessment of qualifications, and issues certificates to learners upon completion. We have over 25 years of experience developing and quality assuring qualifications, training, and course materials. |
| CIWM (WAMITAB) Qualifications Centre | These centres are training organisations that have met our strict quality standards and have been approved to deliver our qualifications to learners. They include private providers, colleges of further education, employers, and prisons. |
| Competence | Competence, in relation to the qualification, describes your ability to consistently be able to undertake work activities, know and understand work-related tasks as per the requirements set out in the standards. |
| Learner | A person who is registered to work towards achievement of a qualification – i.e. you! |
| Learning Outcome | These set out what you will be expected to know, understand or be able to do. Each learning outcome relates to one or more assessment criteria, and together they set a clear assessment standard for each unit. |
| Multiple Choice Tests | A form of assessment where learners are asked to select the best possible answer from the list provided. |
| Tutor | A person employed to instruct an individual or small group on a particular topic. Tutors that deliver knowledge and understanding qualifications and units should have relevant competence and experience in the subject that they are delivering and have experience of delivering vocational learning. |
| Units – Mandatory and Optional | Units form the building blocks of all qualifications that are nationally regulated on the Qualification Credit Framework. Units are small chunks of learning that focus on specific aspects of knowledge, skills and understanding. Mandatory units are those that you must achieve, and Optional units offer a range of subjects that you may choose between. |
| Vocational | A qualification is vocational when it relates directly to the skills, knowledge and understanding required to undertake a specific or broad job role. |

Unit Terms

| Instructional verbs | Definition |
|---------------------|--|
| Assess | To offer a reasoned judgement of the standard, quality of situation or ability informed by relevant facts. |
| Define | Provide a generally recognised or accepted definition. |
| Describe | Provide a vivid picture of what it is by using imagery, adjectives and adverbs to make the subject easy to understand. It may also convey an idea or fact. |
| Differentiate | To look at the characteristics of an item or situation/activity and explain the differences. |
| Evaluate | To look at whatever the required content/process is and suggest other relevant, significant or possible outcomes. It is the process of exploring, checking and suggesting a likely outcome with reasons. |
| Explain | To provide a comprehensive answer that shows an understanding of the content/process mentioned. The answer should include: what it is, how it works, what it looks like, what it does, how it happens, why it happens and any relevant reasons. |
| Identify | This requires the learner to list and describe what is required or relevant to produce an outcome, or requires the learner to make choices to achieve a particular aspect of their job. At Level 4, this would require the learner to say what is available, make the choice and then to explain or justify why the choice was made. |
| List | To produce a number of relevant items which apply to the question. Further description is not required. |
| Name | To name something. |
| State | To express something definitely or clearly in speech or writing. |
| Summarise | To give a brief statement in your own words of the main points. |

Appendix 1: CIWM Guidance Note - Tax Disc Related Criteria

This Guidance Note has been compiled to clarify evidence requirements for Learning Outcomes and/or Assessment Criteria related directly to Tax Discs. From 1st October 2014 Tax Discs will no longer be required to be displayed on vehicles, and this will impact qualifications where learners are required to;

- State the information held on a tax disc
- Explain the importance of recording tax disc information accurately

These criteria apply in all pathways of both the Level 2 Award for Parking Enforcement Officers, and the CIWM WAMITAB Level 3 Award in Notice Processing.

From 21st October 2015, all multiple choice questions relating to these criteria were removed, and learners will no longer be tested in this area. Reference to these criteria in assignments must also be removed, and Centre's will be required to update their assignment papers. Learners will not be required to provide any other forms of evidence to demonstrate competency with these areas of the standards.

This position is to be upheld by all Centres, and for all learners, until such time as further guidance and/or amendments to the qualifications are officially made by CIWM.

Appendix 2: Qualification Structure

Learners must complete the mandatory unit and then one unit from optional groups 1 to 4 to achieve the qualification.
