

CIWM (WAMITAB) Level 4 Medium **Risk Operator** Competence for Mechanical Biological Treatment

Together, we stand for a world beyond waste Version 5, September 2023

Qualification Code: 601/8523/5 CIWM Code: MROC18 Maximum Guided Learning Hours: 38 Total Qualification Time: 104

Waste facilities covered:

Mechanical Biological Treatment (MBT)

About CIWM and this Handbook

About CIWM

CIWM is an awarding organisation and charity that develops qualifications for those working in cleaning, street cleansing, facilities management, resource management, recycling and parking from operative through to management level.

As the leading professional body for resource and waste professionals, CIWM (Chartered Institution of Wastes Management) is the voice of the sector and represents over 5,500 individuals in the UK and overseas.

CIWM has a unique understanding of the sector. Our professional knowledge and trusted reputation enables us to inform and influence legislation and policy, playing a vital part in shaping the future role and reputation of the sector.

Equal Opportunities

CIWM supports the principles of equal opportunities, and we are committed to meeting these principles in the provision of all our qualifications and assessments. We firmly believe that all learners and stakeholders are therefore entitled to receive equal treatment irrespective of age, sex, race, marital status, religion, disability, or sexual orientation.

The Purpose of this Qualification Handbook

Welcome to your CIWM Qualification Handbook. This will help you to complete your qualification. It contains:

- The units you need to achieve to complete your qualification.
- Information about your responsibilities as a candidate.
- Reference information covering each learning outcome and assessment criteria.

Qualification Structure

Frequently Asked Questions

What is a regulated qualification?

A regulated qualification demonstrates that you have the knowledge, skills and/or understanding to meet the standards expected by employers in your industry. Your qualification is recognised by CIWM and one or more of the educational regulators across the UK.

What is the objective of this qualification?

This qualification is part of the CIWM/WAMITAB Operator Competence Scheme and is designed to provide technically competent people with the knowledge and skills to ensure waste sites comply with either:

- Environmental Permitting Regulations (England and Wales) 2007
- The Waste Management Licensing (Amendment) Regulations (Northern Ireland) 2015

Achievement of this qualification demonstrates competence by the learner to manage permitted waste facilities in England, Wales and Northern Ireland.

Who is it for?

- Technically competent managers (TCM)
- Consultants
- Site managers and supervisors

What are the entry requirements of this qualification?

This qualification is open entry. This means that learners interested in undertaking this qualification do not require any other qualifications or levels of attainment in order to take this qualification.

What job role could this qualification lead to or support?

This qualification is ideal for new or experienced people managing waste and resource management operations that require evidence of their competence, knowledge and skills to ensure waste sites comply with the relevant legislation in England, Wales or Northern Ireland. Once you have achieved your Operator Competence qualification, you will be required to pass a Continuing Competence assessment every two years if you wish to act as the recognised technically competent manager (TCM) on a waste site. All TCM's must be able to demonstrate that they have kept their knowledge and skills up to date.

What do I need to achieve?

To achieve this qualification, you will need to complete the six mandatory units.

Mandatory Unit Group

- Maintain health and safety in the waste and resource management industry (OCS01)
- Manage the environmental impact of work activities (OCS02)
- Manage the movement, sorting and storage of waste (OCS05)
- Manage the reception of non-hazardous waste (OCS12)

- Manage site operations for the biological treatment of nonhazardous waste (OCS29)
- Manage transfer and disposal from biological treatment operations (OCS60)

What is a unit?

The units of a qualification describe what you must be able to do and understand to perform work activities competently in your job role.

- Learning outcomes: describe what tasks you will be able to do as a result of learning.
- Assessment criteria: describe what activities you will need to do and what you must know to complete each task.

What is a CIWM (WAMITAB) Qualifications Centre?

You will gain your qualification through a CIWM (WAMITAB) Qualifications Centre. It may be your place of work, a local college or training provider. Assessment of your qualification will be carried out at your place of work and the centre is responsible for the administration. Centre staff will therefore:

- Register you with CIWM.
- Provide a registration number.
- Apply for your certificate when you have completed your qualification or units.

How long will it take?

You have two years to complete your qualification from the date of registration, but your centre may have some requirements that they will explain to you.

Who will help me achieve my qualification?

The following people at the CIWM (WAMITAB) Qualifications Centre will help you to achieve your qualification:

Your Assessor

The assessor is the person you will have the most contact with as you work towards your qualification. They will:

- Help you identify any training you need.
- Help you plan your workload and organise your evidence.
- Observe you carrying out your job in the workplace over a period of time.
- Ask questions about the work you do.
- Make decisions about your evidence.
- Judge when you are competent.
- Provide feedback.

Internal Quality Assurer

The internal quality assurer maintains the quality of assessment within the centre.

External Quality Assurer

An external quality assurer is employed by CIWM to ensure that your centre meets the required national standards for quality and assessment.

What are my responsibilities as a learner?

You will need to:

- Provide your centre with your personal details so they can register you with CIWM
- Comply with health and safety law and regulations

What steps will I need to take to complete my qualification?

- 1. **Planning:** Your assessor will tell you about the mandatory units of the qualification and will help you to select relevant optional units.
- 2. **Evidence:** You will gather evidence for your portfolio (see next question for types of evidence).
- 3. **Feedback:** Your assessor will provide regular feedback on your progress and will arrange for additional training if needed. When your assessor confirms you are competent after an assessment, it will be recorded in your handbook.
- 4. Achievement: Once you have completed all the units and gathered all the evidence you need, your centre will apply for your CIWM certificate.

What are the evidence requirements for this qualification?

The primary sources of evidence for this qualification are:

Observation (O): Direct observation or witness testimony where direct observation is not possible. Where this evidence type has been suggested against Assessment Criteria which require the candidate to explain or describe, the assessor must hear or observe the explanation/description (directly or being delivered to others) or see it in writing. The assessor must not infer that the candidate can explain/describe based purely on observation.

Question and Answer (Q/A): candidate statements, verbal questioning, professional discussion, written questions, product evidence supported by questioning

Simulation / Realistic working environment (S/R): Should be used as a last resort where allowed. Please see the Energy and Utility Skills Assessment Strategy for further information.

Where do I go if I need more information about my qualification and assessments?

- Your assessor
- Your qualification workbook
- CIWM

Useful Words

Instructional verbs	Definition
Assessment Criteria	These specify the standard that you are expected to meet to demonstrate that you have achieved the Learning
	Outcome. Assessment criteria are detailed enough to allow judgments to be made about your competence.
Awarding Organisation	To have a qualification recognised in the UK it must be accredited through an awarding body. These
	organisations are regulated by Ofqual in England, Qualifications Wales, CCEA in Northern Ireland and SQA in
	Scotland to ensure that you receive a high quality, recognised qualification upon completion of the course.
CIWM	An Awarding Organisation for a wide range of qualifications in waste management and recycling, cleaning and
	street cleansing, facilities management, and parking. CIWM is responsible for ensuring the on-going quality of the
	delivery and assessment of qualifications, and issues certificates to learners upon completion. We have over 25
	years of experience developing and quality assuring qualifications, training, and course materials.
CIWM (WAMITAB) Qualifications	These centres are training organisations that have met our strict quality standards and have been approved to
Centre	deliver our qualifications to learners. They include private providers, colleges of further education, employers, and
	prisons.
Competence	Competence, in relation to the qualification, describes your ability to consistently be able to undertake work
	activities, know and understand work-related tasks as per the requirements set out in the standards.
Learner	A person who is registered to work towards achievement of a qualification – i.e. you!
Learning Outcome	These set out what you will be expected to know, understand or be able to do. Each learning outcome relates to
	one or more assessment criteria, and together they set a clear assessment standard for each unit.
Multiple Choice Tests	A form of assessment where learners are asked to select the best possible answer from the list provided.
Tutor	A person employed to instruct an individual or small group on a particular topic. Tutors that deliver knowledge
	and understanding qualifications and units should have relevant competence and experience in the subject that
	they are delivering and have experience of delivering vocational learning.
Units – Mandatory and Optional	Units form the building blocks of all qualifications that are nationally regulated on the Qualification Credit
	Framework. Units are small chunks of learning that focus on specific aspects of knowledge, skills and
	understanding.
	Mandatory units are those that you must achieve, and Optional units offer a range of subjects that you may
	choose between.
Vocational	A qualification is vocational when it relates directly to the skills, knowledge and understanding required to
	undertake a specific or broad job role.

Unit Terms

Instructional verbs	Definition
Adapt	To change something to make suitable for new purpose.
Advise	To inform someone about a fact or situation formally or officially.
Analyse	To look at something (e.g. a process) and use given classifications or principles to gain a further understanding.
Apply	To put something into action. A "doing" task which requires "real" evidence from a workplace scenario.
Assess	To offer a reasoned judgement of the standard, quality of situation or ability informed by relevant facts.
Brief	To instruct or inform someone thoroughly to prepare them.
Carry out	To undertake an activity of a practical nature.
Check	To verify or establish. To examine something in order to confirm its accuracy, quality or condition.
Collect	To bring or gather together.
Communicate	To share or exchange information, news or ideas by speech, writing etc
Compare	To look at the characteristics of an item or activity and note the similarities and differences.
Complete	To finish.
Comply	To act in accordance with specified standards or requirements.
Conduct	To do or carry out.
Confirm	To check if something is true, correct, completed or in place.
Consult	To seek information or advice from an expert or professional. To have discussions with someone before
	undertaking a course of action.
Critically Compare	To look at the characteristics of an item or situation, note the similarities and differences and their respective
	positive and negative aspects. In some cases, this can include the use of the comparison in context as the basis
	for decision making.
Define	Provide a generally recognised or accepted definition.
Demonstrate	To clearly show e.g. by practical exhibition (in real time) and/or historic evidence. These would normally be
	accompanied by an explanation.
Describe	Provide a vivid picture of what it is by using imagery, adjectives and adverbs to make the subject easy to
	understand. It may also convey an idea or fact.
Determine	To find out or decide e.g. what is relevant. To find a solution by following a set of procedures. To calculate a
	numeric value.
Develop	Build a process or activity or understanding either from scratch or using an existing product to create something
	workable.
Differentiate/ Distinguish	To look at the characteristics of an item or situation/activity and explain the differences.

Discuss	To give an account that addresses a range of ideas and arguments.
Ensure	To make certain that something will occur or is the case.
Establish	To set up.
Evaluate/ Justify	To look at whatever the required content/process is and suggest other relevant, significant or possible outcomes. It is the process of exploring, checking and suggesting a likely outcome with reasons.
Examine	To look at, inspect or scrutinise carefully.
Explain	To provide a comprehensive answer that shows an understanding of the content/process mentioned. The answer should include: what it is, how it works, what it looks like, what it does, how it happens, why it happens and any relevant reasons.
Follow	To be guided by instructions.
Give	To supply/provide without explanation.
Identify	This requires the learner to list and describe what is required or relevant to produce an outcome, or requires the learner to make choices to achieve a particular aspect of their job. At Level 4, this would require the learner to say what is available, make the choice and then to explain or justify why the choice was made.
Implement	To put something into practice after the development process has taken place. This ensures that the product/process is actually employed and/or used by self and others during work activities.
Inform	To give someone facts or information.
Кеер	To have or retain possession of something.
List	To produce a number of relevant items which apply to the question. Further description is not required.
Maintain	To enable something to continue. To keep something in good condition.
Make	To create, produce or form something.
Manage	After a development process ensure that the product/process works using relevant management techniques.
Minimise	To reduce something to the smallest possible amount or degree.
Monitor	To check if a process or activity is carried out correctly.
Notify	To inform someone of something in a formal or official manner.
Obtain	Acquire.
Organise	To arrange systematically. To coordinate activities. To make arrangements or preparations.
Outline	A description setting out main characteristics or points.
Plan	To consider, set out and communicate what needs to be done.
Prepare	To make ready for use or consideration. To create in advance.
Process	A systematic series of actions.
Produce	To create, manufacture or make something.
Promote	To support or actively encourage. To further progress.
Propose	To put forward an idea, plan or suggestion for consideration.

Provide	To make available or supply.
Recognise	To be aware of, familiar with and able to identify an activity or product.
Recommend	To suggest or put something forward as being suitable for a particular purpose or role with reasons why.
Rectify	To correct or put right.
Refer	To pass the matter to the responsible person for a decision.
Reflect	To look back upon and appraise.
Report	To prepare a detailed account or statement about an event or topic.
Request	To formally ask for something.
Research	To investigate/study to establish facts and reach a conclusion.
Resolve	To settle or find a solution to a problem.
Respond	To react quickly or positively to something.
Review	To formally assess something with the intension of instituting change if required.
Secure	To obtain something e.g. commitment from colleagues.
Seek	To ask for something from someone.
Select	To carefully choose the most suitable option for a task/purpose.
Set up	To prepare a system or set of equipment for operation.
Specify	To state a fact or requirement clearly and precisely.
State	To express something definitely or clearly in speech or writing.
Suggest	To give possible alternatives, produce or put forward an idea/plan.
Summarise	To give a brief statement in your own words of the main points.
Take action/ measures/ steps	To do something to achieve an aim or deal with a problem.
Train	To teach a person a particular skill or type of behaviour through practice and instruction.
Undertake	To take part in or carry out an activity/task.
Use	To apply information or prior learning. To put into service or action. To employ for a given purpose.

sites which handle waste.	 4.2 Establish systems to control the movement of vehicles and plant on site to comply with health, safety and organisational requirements. 4.3 Implement and enforce organisational procedure to generate site rules for vehicles, plant and crews on the site that comply with legislative requirements and organisational procedures. 	
5. Be able to use, record and communicate	 5.1 Give instructions for moving, sorting and storage of waste in accordance with organisational procedures. 5.2 Maintain records and provide information for the moving, 	
information.	 sorting and storage of waste. 5.3 Inform site personnel of all procedures for onsite activities to maintain the quality of the organisation's work. 5.4 Monitor and review the work programme and instructions to ensure accuracy. 5.5 Communicate work instructions verbally and in writing. 5.6 Check that employees have understood work 	Image: Constraint of the second sec
	instructions. 5.7 Advise relevant people about accidents, incidents, interruptions to work, near hits and/or any situations that require their attention. 5.8 Maintain a record of training for all staff employed on the site.	
6. Be able to resolve problems which arise during or resulting	6.1 Recommend steps to rectify any staff shortages, equipment deficiencies or external factors that prevent the movement, sorting or storage of wastes.	
from the movement, sorting and storage of waste.	6.2 Seek specialist advice to resolve situations which arise outside own area of responsibility.6.3 Implement procedures for dealing with spillages on site and ensure staff compliance.	

Manage the reception of non-hazardous waste (OC\$12)

Level: 3	Assessment Citatin	Evidence	Portfolio	Comments
Learning Outcome 1. Understand the regulations, procedures and requirements for managing waste operations.	 Assessment Criteria 1.1. Describe the legislative requirements, codes of practice and guidance applicable to the reception of non- hazardous waste on the site. 1.2. Describe the regulatory requirements and organisational procedures for dealing with unauthorised wastes. 1.3. Describe the organisational procedures for managing work activities on the site. 1.4. Describe the planning permission, permit requirements and environmental management system (EMS) for the site. 1.5. Describe the waste inspection, identification procedures and handling requirements for the types of non- 	Туре	Ref No	
	 hazardous waste received on site. 1.6. Describe the uses, purposes and processing requirements for documents relating to the reception and validation of non-hazardous waste received on the site. 1.7. Describe the records required by legislation and by organisational procedures relating to the reception, inspection and validation of non-hazardous wastes. 1.8. Describe the organisational procedures for the delivery of 			
2. Understand the health, safety and	 2.1. Describe the organisational environmental policy and procedures applicable to the site. 			
environmental impacts associated with the reception of non-hazardous waste.	 2.2. Identify hazards associated with the reception of non-hazardous waste on site in relation to: health and safety environment 2.3. Describe risk analysis to minimise hazards to personnel and the environment for the whole workplace. 			

2.4. Identify risks to the environment and human health resulting from the reception, inspection and validation of non-hazardous wastes. 2.5. State the types of personal protective equipment (PPE) required and how they must be used, maintained and stored. 3. Be able to implement systems and procedures to manage the reception of non-hazardous wastes in accordance with legislative and organisational requirements. 3.2. Implement systems and procedures that comply with legislative requirements to deal with non-hazardous wastes that need specific handling. 3.3. Implement systems and procedures that comply with legislative requirements to the rejection of unauthorised non-hazardous waste. 3.3. Implement systems and procedures that comply with legislative requirements for the rejection of unauthorised non-hazardous wastes. 3.4. Establish systems to control the movement of vehicles entering, moving around and leaving the site. 3.5. Ensure personnel implement procedures and comply with legislative requirements for non-hazardous waste reception. 3.6. Manage site operations for the biological treatment of non-hazardous waste (OCS29)

Level: 4	Level: 4 Evidence Portfolio			Comments
Learning Outcome	Assessment Criteria	Туре	Ref No	
1. Understand the legislative and organisational requirements for site management of non-hazardous waste biological treatment operations	 Describe the legislative requirements, regulations, codes of practice and guidance applicable to the biological treatment of non-hazardous waste at the site. Describe the planning permission, permit requirements and environmental management system (EMS) for the site. Describe waste inspection and identification procedures. Describe lifting and handling requirements and techniques for the types of waste received on the site. Describe the storage requirements for the non-hazardous waste types handled on the site, and outputs stored on site. Describe the procedures and documentation required for 			
	 biological treatment of non-hazardous waste to specific standards. 1.7. Describe the Control of Substances Hazardous to Health (COSHH) and risk assessment data for substances received, handled and used on site. 1.8. Describe the procedures for dealing with non-hazardous 			
	 waste, out of specification waste and any other residues from the process. 1.9. Explain how to interpret process documentation and verify that the information is accurate. 			
2. Understand how to maintain adequate resources for site operations	 2.1. Describe the organisational procedures for non-hazardous waste biological treatment operations and the supply and use of resources required. 2.2. Describe the technical skills needed for non-hazardous waste biological treatment operations on site. 			

r		
		2.3. Explain how to ensure that relevant staff have the
		required skills and training.
		2.4. Describe how to communicate work instructions to
		personnel verbally and in writing.
		2.5. Explain why it is important to ensure that staff understand
		instructions, and how to ensure this is achieved.
		2.6. State the types of personal protective equipment (PPE)
		required and how they must be used, maintained and
		stored.
		2.7. Describe the organisational requirements and operational
		procedures for all machinery, plant and equipment used
		on the site.
		2.8. Identify the types, functions and limitations of handling
		equipment available on the site.
3.	Be able to	3.1. Implement systems and procedures for non-hazardous
	manage	waste biological treatment operations in accordance
	biological	with legislative and organisational requirements.
	treatment	3.2. Make arrangements for an adequate supply of resources
	operations for	to carry out site operations, including:
	non-hazardous	materials
	waste	equipment
	(iddite	personnel
		information
		3.3. Comply with legal and organisational requirements for
		reporting risks to health, safety and the environment.
		3.4. Implement and maintain recording and information
		systems specifically relating to the non-hazardous waste
		biological treatment processes in accordance with
		legislative and organisational requirements.
		3.5. Make arrangements for the safe storage of outputs and
		residues from non-hazardous waste biological treatment
		3.6. Maintain the quality of the organisations work by ensuring
		that all procedures and processes are adhered to.

F	
4. Be able to control work activities on waste sites	4.1. Establish and oversee programmes of work which meet the legislative and organisational requirements required for non-hazardous waste biological treatment operations.
	4.2. Implement site operating procedures that comply with health and safety and environmental protection requirements.
	4.3. Monitor and maintain systems to ensure that there are sufficient personnel with required skills, and implement training programmes where required.
	4.4. Ensure that staff understand procedures and implement them in compliance with legislative and organisational requirements.
	4.5. Maintain safe systems of work and put in place controls to eliminate or reduce risk from hazards.
	 4.6. Identify potential hazards and take steps to reduce risks to personnel and the environment, relating to wastes which: are difficult to handle may have unacceptable or unauthorised components are likely to present unexpected health problems
	 4.7. Monitor staff activity on non-hazardous waste biological treatment sites to ensure they enhance or maintain the quality of the organisation's work.
	4.8. Keep accurate records of non-hazardous waste treated and of the control parameters for the non-hazardous biological treatment process.
5. Be able to resolve problems which may arise from	5.1. Recommend steps to rectify any staff shortages, equipment deficiencies or external causes that prevent the biological treatment of non-hazardous waste.
non-hazardous biological	5.2. Seek advice to resolve situations which are outside of the responsibility of the job role.
treatment operations	5.3. Implement procedures for dealing with spillages on site and ensure that staff understand and follow prescribed procedures.

5.4. Make arrangements for treatment or disposal for any		
batches of material that fail to meet the quality standards		
required.		

Manage transfer and disposal from biological treatment operations (OCS60)

Level: 4			Portfolio	Comments	
Learning Outcome	Assessment Criteria	Туре	Ref No		
1. Understand the specific regulatory procedures and	1.1. Describe the biological treatment standards and regulatory requirements to be met for recognition of product status for outputs.				
requirements for the transfer of outputs and	1.2. Describe the legislative requirements, regulations, codes of practice and guidance applicable to the transfer and transport of wastes from the site.				
disposal of residues from biological	1.3. Describe the planning permission, permit requirements and environmental management system (EMS) for the site.				
treatment operations	1.4. Describe the legislative requirements for the safe operation of machinery, plant and equipment.				
	1.5. Describe the quality inspection, identification procedures and the handling requirements for the outputs from the site.				
2. Understand the organisational	2.1. Describe the organisational procedures for the management of personnel and work activities.				
procedures for the transfer of outputs	2.2. Describe the on-site procedures for the management and storage of the outputs and residues.				
and disposal of residues from biological	2.3. Describe the organisational procedures for transport operations and the supply and use of the transport resources required.				
treatment operations	2.4. Describe the procedures for dealing with residues, out of specification materials and any other rejects from the process.				
	2.5. Identify the storage and handling implications for the output materials produced on-site.				
	2.6. Identify the types, functions and limitations of waste handling equipment available for use on the site.				

	2.7. Describe the lifting and handling techniques that are suitable for the outputs and residues that are being transported from the site.	
 Know how to identify risks and manage work- related hazards. 	 3.1. Identify hazards associated with biological treatment operations on site in relation to: health and safety environment 3.2. Describe the control measures to reduce or eliminate risks 	
	to safety, health and the environment associated with biological treatment operations on site.	
	3.3. Describe how to use risk assessment and analysis to minimise hazards to personnel and the environment in the workplace.	
	3.4. Describe the organisational procedures for dealing with spillages and emissions.	
	3.5. State the types of personal protective equipment (PPE) required and how they must be used, maintained and stored.	
	3.6. Describe legal and organisational requirements for recording and reporting risks to health, safety and the environment.	
4. Be able to implement	4.1. Implement systems and procedures for the transfer and transport of outputs from biological treatment operations.	
management systems for	4.2. Implement systems and procedures for the disposal of residues from biological treatment operations.	
biological treatment operations	4.3. Make arrangements for the supply of materials, equipment and information needed to carry out loading and transport operations from the site.

	4.5. Apply management systems to ensure that all procedures and waste transfer and disposal processes are adhered to.	
5. Be able to manage information for the	5.1. Ensure that transport documentation for all materials leaving the site is completed in order to comply with legislative and organisational requirements.	

transfer of outputs and disposal of residues from	5.2. Interpret process documentation and verify that the information is accurate and relates to the recovered wastes and residues.	
biological treatment processes.	5.3. Maintain records of all outputs and residues leaving the site in accordance with legislative and organisational requirements.	
	5.4. Implement and maintain a system to record testing and analysis data on outputs.	
	5.5. Prepare documentation to inform users of the outputs about the characteristics of the materials.	
6. Be able to resolve problems which arise from the	6.1. Take action to rectify any staff or transport shortages, equipment deficiencies or external causes that affect biological treatment processes.	
transfer of outputs and disposal of	6.2. Implement and communicate procedures for dealing with spillages on site.	
residues from biological treatment	6.3. Make arrangements for alternative transport and recipients for outputs and residues when existing arrangements are not available.	
processes.	6.4. Make arrangements for reprocessing or disposing of outputs that have failed to meet the prescribed standards for the site.	
	6.5. Seek specialist advice to resolve situations which are outside the responsibility of the job role.	

Glossary

Dynamic risk assessment refers to the continuous process of identifying hazards and assessing risk as they arise during work activities so operators can take action to eliminate or reduce risk, as well as monitor and review existing control measures.

Hazard refers to a potential source of harm or negative health effect.

Hazardous waste refers to waste that is dangerous or potentially harmful to our health or the environment. Hazardous wastes can be liquids, solids, gases, or sludges.

Health and safety refers to the regulations and procedures intended to prevent accident or injury.

Inert waste refers to waste that does not experience any significant physical, chemical or biological transformations e.g. it will not dissolve, burn, react, biodegrade or adversely affect other matter.

Operator refers to the person who has control over the operation of a regulated facility

Organisational procedures refer to a series of principles, rules and guidelines designed to ensure organisations reach their long-term goals.

Personal protective equipment (PPE) refers to protective clothing, helmets, goggles or other equipment designed to protect your body from harm.

Risk refers to a situation that exposes someone or something of value to danger.

Risk assessment refers to a systematic process you are required to carry out by law to evaluate potential risks that may be involved in an activity.

Training refers to an organised activity designed to teach a person a particular skill or behaviour to improve performance.

Waste refers to a material, substance or by-product eliminated or discarded as no longer useful or required after the completion of a process.

Waste hierarchy prioritises ways of dealing with waste based on how good they are for the environment.

Working at height refers to any place where a person could fall a distance liable to cause personal injury.

Qualification Structure

To achieve this qualification, learners will need to complete six mandatory units:

Mandatory Units

Ofqual Code	Title	Level	Code
A/508/0756	Maintain health and safety in the waste and resource management industry	4	OCS01
F/508/0757	Manage the environmental impact of work activities	4	OCS02
F/508/0760	Manage the movement, sorting and storage of waste	4	OCS05
J/508/0887	Manage the reception of non-hazardous waste	3	OCS12
F/508/0998	Manage site operations for the biological treatment of non-hazardous waste	4	OCS29
J/508/0985	Manage transfer and disposal from biological treatment operations	4	OCS60

Our purpose is to move the world beyond waste

Help us protect the environment by only printing this document if absolutely necessary and, where possible, please only print the pages you need.

This document has been designed to use minimal ink when printed.

Qualifications

Together, we stand for a world beyond waste

More for professional life

Our mission is to unite, equip and mobilise our professional community to lead, influence and deliver the science, strategies, businesses and policies for the sustainable management of resources and waste.

For more information about how we can support you, visit **ciwm.co.uk.**
