

Version 5, September 2023

Qualification Code: 601/8515/6 CIWM Code: MROC5 Maximum Guided Learning Hours: 39 Total Qualification Time: 108

CIWM (WAMITAB) Level 4 Medium **Risk Operator** Competence for Anaerobic Digestion

Together, we stand for a world beyond waste

Waste facilities covered:

- Anaerobic Digestion Facility including use of the resultant biogas
- On farm Anaerobic Digestion facilities including the use of the resultant biogas

## About CIWM and this Handbook

#### About CIWM

CIWM is an awarding organisation and charity that develops qualifications for those working in cleaning, street cleansing, facilities management, resource management, recycling and parking from operative through to management level.

As the leading professional body for resource and waste professionals, CIWM (Chartered Institution of Wastes Management) is the voice of the sector and represents over 5,500 individuals in the UK and overseas.

CIWM has a unique understanding of the sector. Our professional knowledge and trusted reputation enables us to inform and influence legislation and policy, playing a vital part in shaping the future role and reputation of the sector.

#### **Equal Opportunities**

CIWM supports the principles of equal opportunities, and we are committed to meeting these principles in the provision of all our qualifications and assessments. We firmly believe that all learners and stakeholders are therefore entitled to receive equal treatment irrespective of age, sex, race, marital status, religion, disability, or sexual orientation.

#### The Purpose of this Qualification Handbook

Welcome to your CIWM Qualification Handbook. This will help you to complete your qualification. It contains:

- The units you need to achieve to complete your qualification.
- Information about your responsibilities as a candidate.
- Reference information covering each learning outcome and assessment criteria.

Qualification Structure

## Frequently Asked Questions

#### What is a regulated qualification?

A regulated qualification demonstrates that you have the knowledge, skills and/or understanding to meet the standards expected by employers in your industry. Your qualification is recognised by CIWM and one or more of the educational regulators across the UK.

#### What is the objective of this qualification?

This qualification is part of the CIWM/WAMITAB Operator Competence Scheme and is designed to provide technically competent people with the knowledge and skills to ensure waste sites comply with either:

- Environmental Permitting Regulations (England and Wales) 2007
- The Waste Management Licensing (Amendment) Regulations (Northern Ireland) 2015

Achievement of this qualification demonstrates competence by the learner to manage permitted waste facilities in England, Wales and Northern Ireland.

#### Who is it for?

- Technically competent managers (TCM)
- Consultants
- Site managers and supervisors

#### What are the entry requirements of this qualification?

This qualification is open entry. This means that learners interested in undertaking this qualification do not require any other qualifications or levels of attainment in order to take this qualification.

#### What job role could this qualification lead to or support?

This qualification is ideal for new or experienced people managing waste and resource management operations that require evidence of their competence, knowledge and skills to ensure waste sites comply with the relevant legislation in England, Wales or Northern Ireland. Once you have achieved your Operator Competence qualification, you will be required to pass a Continuing Competence assessment every two years if you wish to act as the recognised technically competent manager (TCM) on a waste site. All TCM's must be able to demonstrate that they have kept their knowledge and skills up to date.

#### What do I need to achieve?

To achieve this qualification, you will need to complete the six mandatory units.

#### Mandatory Unit Group

- Maintain health and safety in the waste and resource management industry (OCS01)
- Manage the environmental impact of work activities (OCS02)
- Manage the movement, sorting and storage of waste (OCS05)
- Manage the reception of non-hazardous waste (OCS12)
- Manage site operations for the anaerobic digestion of nonhazardous waste (OCS32)

 Manage transfer and disposal from anaerobic digestion operations (OCS63)

#### What is a unit?

The units of a qualification describe what you must be able to do and understand to perform work activities competently in your job role.

- Learning outcomes: describe what tasks you will be able to do as a result of learning.
- Assessment criteria: describe what activities you will need to do and what you must know to complete each task.

#### What is a CIWM (WAMITAB) Qualifications Centre?

You will gain your qualification through a CIWM (WAMITAB) Qualifications Centre. It may be your place of work, a local college or training provider. Assessment of your qualification will be carried out at your place of work and the centre is responsible for the administration. Centre staff will therefore:

- Register you with CIWM.
- Provide a registration number.
- Apply for your certificate when you have completed your qualification or units.

#### How long will it take?

You have two years to complete your qualification from the date of registration, but your centre may have some requirements that they will explain to you.

#### Who will help me achieve my qualification?

The following people at the CIWM (WAMITAB) Qualifications Centre will help you to achieve your qualification:

#### Your Assessor

The assessor is the person you will have the most contact with as you work towards your qualification. They will:

- Help you identify any training you need.
- Help you plan your workload and organise your evidence.
- Observe you carrying out your job in the workplace over a period of time.
- Ask questions about the work you do.
- Make decisions about your evidence.
- Judge when you are competent.
- Provide feedback.

#### Internal Quality Assurer

The internal quality assurer maintains the quality of assessment within the centre.

#### **External Quality Assurer**

An external quality assurer is employed by CIWM to ensure that your centre meets the required national standards for quality and assessment.

#### What are my responsibilities as a learner?

You will need to:

- Provide your centre with your personal details so they can register you with CIWM
- Comply with health and safety law and regulations

#### What steps will I need to take to complete my qualification?

- 1. **Planning:** Your assessor will tell you about the mandatory units of the qualification and will help you to select relevant optional units.
- 2. **Evidence:** You will gather evidence for your portfolio (see next question for types of evidence).
- 3. **Feedback:** Your assessor will provide regular feedback on your progress and will arrange for additional training if needed. When your assessor confirms you are competent after an assessment, it will be recorded in your handbook.
- 4. Achievement: Once you have completed all the units and gathered all the evidence you need, your centre will apply for your CIWM certificate.

#### What are the evidence requirements for this qualification?

The primary sources of evidence for this qualification are:

**Observation (O):** Direct observation or witness testimony where direct observation is not possible. Where this evidence type has been

suggested against Assessment Criteria which require the candidate to explain or describe, the assessor must hear or observe the explanation/description (directly or being delivered to others) or see it in writing. The assessor must not infer that the candidate can explain/describe based purely on observation.

**Question and Answer (Q/A):** candidate statements, verbal questioning, professional discussion, written questions, product evidence supported by questioning

Simulation / Realistic working environment (S/R): Should be used as a last resort where allowed. Please see the Energy and Utility Skills Assessment Strategy for further information.

## Where do I go if I need more information about my qualification and assessments?

- Your assessor
- Your qualification workbook
- CIWM

## **Useful Words**

Instructional verbs	Definition		
Assessment Criteria	These specify the standard that you are expected to meet to demonstrate that you have achieved the Learning		
	Outcome. Assessment criteria are detailed enough to allow judgments to be made about your competence.		
Awarding Organisation	To have a qualification recognised in the UK it must be accredited through an awarding body. These		
	organisations are regulated by Ofqual in England, Qualifications Wales, CCEA in Northern Ireland and SQA in		
	Scotland to ensure that you receive a high quality, recognised qualification upon completion of the course.		
CIWM	An Awarding Organisation for a wide range of qualifications in waste management and recycling, cleaning and		
	street cleansing, facilities management, and parking. CIWM is responsible for ensuring the on-going quality of the		
	delivery and assessment of qualifications, and issues certificates to learners upon completion. We have over 25		
	years of experience developing and quality assuring qualifications, training, and course materials.		
CIWM (WAMITAB) Qualifications	These centres are training organisations that have met our strict quality standards and have been approved to		
Centre	deliver our qualifications to learners. They include private providers, colleges of further education, employers, and		
	prisons.		
Competence Competence, in relation to the qualification, describes your ability to consistently be able to unde			
	activities, know and understand work-related tasks as per the requirements set out in the standards.		
Learner	A person who is registered to work towards achievement of a qualification – i.e. you!		
Learning Outcome	These set out what you will be expected to know, understand or be able to do. Each learning outcome relates to		
	one or more assessment criteria, and together they set a clear assessment standard for each unit.		
Multiple Choice Tests	A form of assessment where learners are asked to select the best possible answer from the list provided.		
Tutor	A person employed to instruct an individual or small group on a particular topic. Tutors that deliver knowledge		
	and understanding qualifications and units should have relevant competence and experience in the subject that		
	they are delivering and have experience of delivering vocational learning.		
Units – Mandatory and Optional	Units form the building blocks of all qualifications that are nationally regulated on the Qualification Credit		
	Framework. Units are small chunks of learning that focus on specific aspects of knowledge, skills and		
	understanding.		
	Mandatory units are those that you must achieve, and Optional units offer a range of subjects that you may		
	choose between.		
Vocational	A qualification is vocational when it relates directly to the skills, knowledge and understanding required to		
	undertake a specific or broad job role.		

## Unit Terms

Instructional verbs	Definition		
Adapt	To change something to make suitable for new purpose.		
Advise	To inform someone about a fact or situation formally or officially.		
Analyse	To look at something (e.g. a process) and use given classifications or principles to gain a further understanding.		
Apply	To put something into action. A "doing" task which requires "real" evidence from a workplace scenario.		
Assess	To offer a reasoned judgement of the standard, quality of situation or ability informed by relevant facts.		
Brief	To instruct or inform someone thoroughly to prepare them.		
Carry out	To undertake an activity of a practical nature.		
Check	To verify or establish. To examine something in order to confirm its accuracy, quality or condition.		
Collect	To bring or gather together.		
Communicate	To share or exchange information, news or ideas by speech, writing etc		
Compare	To look at the characteristics of an item or activity and note the similarities and differences.		
Complete	To finish.		
Comply	To act in accordance with specified standards or requirements.		
Conduct	To do or carry out.		
Confirm	To check if something is true, correct, completed or in place.		
Consult	To seek information or advice from an expert or professional. To have discussions with someone before		
	undertaking a course of action.		
Critically Compare	To look at the characteristics of an item or situation, note the similarities and differences and their respective		
	positive and negative aspects. In some cases, this can include the use of the comparison in context as the basis		
	for decision making.		
Define	Provide a generally recognised or accepted definition.		
Demonstrate	To clearly show e.g. by practical exhibition (in real time) and/or historic evidence. These would normally be		
	accompanied by an explanation.		
Describe	Provide a vivid picture of what it is by using imagery, adjectives and adverbs to make the subject easy to		
	understand. It may also convey an idea or fact.		
Determine	To find out or decide e.g. what is relevant. To find a solution by following a set of procedures. To calculate a		
	numeric value.		
Develop	Build a process or activity or understanding either from scratch or using an existing product to create something		
	workable.		
Differentiate/ Distinguish	To look at the characteristics of an item or situation/activity and explain the differences.		

Discuss	To give an account that addresses a range of ideas and arguments.		
Ensure	To make certain that something will occur or is the case.		
Establish	To set up.		
Evaluate/ Justify	To look at whatever the required content/process is and suggest other relevant, significant or possible outcomes. It is the process of exploring, checking and suggesting a likely outcome with reasons.		
Examine	To look at, inspect or scrutinise carefully.		
Explain	To provide a comprehensive answer that shows an understanding of the content/process mentioned. The answer should include: what it is, how it works, what it looks like, what it does, how it happens, why it happens and any relevant reasons.		
Follow	To be guided by instructions.		
Give	To supply/provide without explanation.		
Identify	This requires the learner to list and describe what is required or relevant to produce an outcome, or requires the learner to make choices to achieve a particular aspect of their job. At Level 4, this would require the learner to say what is available, make the choice and then to explain or justify why the choice was made.		
Implement	To put something into practice after the development process has taken place. This ensures that the product/process is actually employed and/or used by self and others during work activities.		
Inform	To give someone facts or information.		
Кеер	To have or retain possession of something.		
List	To produce a number of relevant items which apply to the question. Further description is not required.		
Maintain	To enable something to continue. To keep something in good condition.		
Make	To create, produce or form something.		
Manage	After a development process ensure that the product/process works using relevant management techniques.		
Minimise	To reduce something to the smallest possible amount or degree.		
Monitor	To check if a process or activity is carried out correctly.		
Notify	To inform someone of something in a formal or official manner.		
Obtain	Acquire.		
Organise	To arrange systematically. To coordinate activities. To make arrangements or preparations.		
Outline	A description setting out main characteristics or points.		
Plan	To consider, set out and communicate what needs to be done.		
Prepare	To make ready for use or consideration. To create in advance.		
Process	A systematic series of actions.		
Produce	To create, manufacture or make something.		
Promote	To support or actively encourage. To further progress.		
Propose	To put forward an idea, plan or suggestion for consideration.		

Provide	To make available or supply.
Recognise	To be aware of, familiar with and able to identify an activity or product.
Recommend	To suggest or put something forward as being suitable for a particular purpose or role with reasons why.
Rectify	To correct or put right.
Refer	To pass the matter to the responsible person for a decision.
Reflect	To look back upon and appraise.
Report	To prepare a detailed account or statement about an event or topic.
Request	To formally ask for something.
Research	To investigate/study to establish facts and reach a conclusion.
Resolve	To settle or find a solution to a problem.
Respond	To react quickly or positively to something.
Review	To formally assess something with the intension of instituting change if required.
Secure	To obtain something e.g. commitment from colleagues.
Seek	To ask for something from someone.
Select	To carefully choose the most suitable option for a task/purpose.
Set up	To prepare a system or set of equipment for operation.
Specify	To state a fact or requirement clearly and precisely.
State	To express something definitely or clearly in speech or writing.
Suggest	To give possible alternatives, produce or put forward an idea/plan.
Summarise	To give a brief statement in your own words of the main points.
Take action/ measures/ steps	To do something to achieve an aim or deal with a problem.
Train	To teach a person a particular skill or type of behaviour through practice and instruction.
Undertake	To take part in or carry out an activity/task.
Use	To apply information or prior learning. To put into service or action. To employ for a given purpose.

# Maintain health and safety in the waste and resource management industry (OCS01)

Level: 4		Evidence	Portfolio Ref	Comments
Learning Outcome	Assessment Criteria	Туре	No	
1. Know the requirements of	1.1. Explain the main legal requirements of health and safety legislation on waste and			
health and safety	resource management facilities, in relation			
legislation in the waste and resource	to: • employers			
management	<ul> <li>employees</li> </ul>			
industry.	• others			
	1.2. Describe the different sources of reliable health and safety information.			
	1.3. Identify how to locate current health and safety information.			
	1.4. Describe the main features and legal requirements for:			
	<ul> <li>fire risk assessment</li> </ul>			
	<ul> <li>Plan for managing emergencies</li> <li>CoSHH</li> </ul>			
	PUWER			
	LOLER			
	• DSEAR			
2. Understand the	2.1. Explain the difference between a hazard			
hazards, risks, control	and a risk.			
measures and	2.2. Explain how to complete a risk assessment.			
monitoring associated	2.3. Explain the difference between a formal			
with a waste and	and dynamic risk assessment.			
resource	2.4. Explain the hierarchy of 'control measures'.			
management	2.5. Describe the characteristics of hazardous			
environment.	substances and their warning labels.			

		2.6. State the types of personal protective	
		equipment (PPE) required and how they	
		must be used, maintained, and stored.	 
		2.7. Identify the main causes of accidents and	
		incidents in the workplace.	
		2.8. Explain how to carry out an accident and	
		incident investigation in line with current	
		regulator guidance.	
3.	Be able to make sure	3.1. Conduct a risk assessment and implement	
	that hazards and risks	the control measures.	
	are controlled safely	3.2. Maintain accurate records of workplace	
	and effectively on	irregularities.	
	site.	3.3. Check other people are aware of	
		hazards/risks and the actions to minimise	
		them.	
		3.4. Identify the relevant person in the	
		workplace to whom hazards should be	
		reported.	
		3.5. Confirm that precautions to control risks	
		have been agreed with the people	
		responsible for health and safety on site.	
		3.6. Review to make sure all recommended	
		actions have been taken.	
4.	Be able to implement	4.1. Implement workplace health and safety	
	organisational health	procedures in relation to:	
	and safety	<ul> <li>safe use of plant, machinery, and</li> </ul>	
	procedures on site.	equipment	
		<ul> <li>safe use of chemicals</li> </ul>	
		fire risk	
		<ul> <li>first aid</li> </ul>	
1		<ul> <li>supervision of visitors and contractors</li> </ul>	
		<ul> <li>vehicle movements</li> </ul>	
		<ul> <li>any other site-specific hazards as</li> </ul>	
		detailed on risk assessments	

	4.2. Ensure procedures are in place to check the health and safety competence of employees.	
	4.3. Conduct monitoring of the workplace at agreed intervals and in accordance with workplace instructions.	
	4.4. Respond to any breaches of health and safety.	
	4.5. Identify training needs for self and others and put plans in place to address them.	
5. Be able to monitor and review safety on	5.1 Review performance of health and safety on site.	
site.	5.2 Request feedback on health and safety performance from relevant people.	
	5.3 Make recommendations for any changes to organisational procedures to maintain health and safety on site.	

## Manage the environmental impact of work activities (OC\$02)

Level: 4		Evidence	Portfolio Ref	Comments
Learning Outcome	Assessment Criteria	Туре	No	
<ol> <li>Understand the legal and organisational requirements for managing the</li> </ol>	<ol> <li>Describe the legislative requirements, codes of practice and guidance applicable to the transfer and transport of waste from the site.</li> </ol>			
environmental impact of work activities.	1.2. Explain the organisational procedures for managing the environmental impact of work activities.			
2. Understand how to assess the environmental impact of work activities and how this can be minimised.	2.1. Explain how to assess the impact of work activities and resources in the environment, including risk analysis.			
	2.2. Explain what specialist advice is available to manage the environmental impact of work activities.			
	2.3. Explain how to minimise the environmental impact of work activities.			
	2.4. Explain how to monitor the environmental impact of work activities.			
3. Understand the legal and organisational requirements for	3.1. Explain the legal requirements and current guidance for managing the risk of fires on site.			
managing the risk of fires on site.	3.2. Explain the organisational procedures for managing the risk of fires on site.			
4. Be able to assess and report on the environmental impact of work activities in own	<ul> <li>4.1. Assess the environmental impact on your site of:</li> <li>work activities</li> <li>resource use</li> </ul>			
area of responsibility.	4.2. Review existing control measures for minimising site environmental impacts of:			

	work activities	
	resource use	
	4.3. Analyse the effectiveness of the existing control measures and make recommendations for any improvements including those for:	
	<ul><li>work activities</li><li>resource use</li></ul>	
	4.4. Produce a report on the environmental impact of work activities and resource use, with recommendations for improvement.	
5. Be able to organise work activities and resource use to minimise	5.1. Organise resources in own area of responsibility to reduce environmental impact.	
environmental impact.	5.2. Organise work activities in own area of responsibility to reduce environmental impact.	
6. Be able to promote on- going improvement in	6.1. Monitor the environmental impact of work activities.	
environmental performance.	6.2. Establish ways to identify and report opportunities for improving environmental performance.	
	6.3. Communicate on-going environmental performance.	
7. Be able to implement fire prevention controls and measures on site.	7.1. Identify the types and locations of combustible and flammable materials on site.	
	7.2. Identify the types and locations of potential ignition sources on site.	
	7.3. Identify existing control measures aimed at reducing the risk of fire and the impact should fire occur.	
	7.4. Review the effectiveness of the existing control measures and make	

	recommendations for any improvements.		
7.5	<ol> <li>Ensure control measures are implemented on site to reduce the risk of fire.</li> </ol>		

## Manage the movement, sorting and storage of waste (OC\$05)

Level: 4		Evidence Type	Portfolio Ref	Comments
Learning Outcome	Assessment Criteria	71	Νο	
1. Understand the specific	1.1. Describe the legislative requirements,			
regulation, procedures	codes of practice and guidance			
and requirements for the	applicable to the movement, sorting			
movement, sorting and	and storage of waste from the site.			
storage of waste.	1.2. Describe the legislative requirements			
	and organisational procedures for			
	dealing with unauthorised wastes.			
	1.3. Describe the records required by			
	legislation for the movement, sorting			
	and storage of waste on site.			
	1.4. Describe the planning permission,			
	permit and environmental			
	management system (EMS) for the site.			
	1.5. Describe the types, functions and			
	limitations of waste handling			
	equipment used on site.			
	1.6. Describe the procedures and handling			
	requirements for the types of waste			
	received on site.			
	1.7. Describe the procedures for managing			
	work activities during the movement,			
	sorting and storage of waste on site.			
	1.8. Describe the procedures for managing			
	internal site traffic during the			
	movement, sorting and storage of			
	waste on site.			
	1.9. Describe the procedures for preventing			
	fires during the movement, sorting and			
	storage of waste on site.			

2. Understand the health, safety and environmental implications of movement, segregation and storage of waste.	<ul> <li>2.1. Describe the organisational environmental policy and procedures applicable to the site.</li> <li>2.2. Identify hazards associated with the movement, sorting and storage of waste on site in relation to: <ul> <li>health and safety</li> <li>environment</li> </ul> </li> <li>2.3. Describe the process of risk analysis to minimise hazards to personnel and the environment.</li> <li>2.4. Describe the lifting and handling techniques suitable for moving, sorting and storing wastes on site.</li> <li>2.5. Describe the organisational procedures for dealing with spillages and emissions on site.</li> <li>2.6. Describe the organisational procedures for dealing with fires on site.</li> <li>2.7. State the types of personal protective equipment (PPE) required and how they must be used, maintained and stored.</li> <li>2.8. Describe the importance of personnel compliance with health and safety requirements for: <ul> <li>use of personal protective equipment (PPE)</li> <li>use of vehicles, plant and machinery</li> </ul> </li> </ul>	
	<ul> <li>use of waste handling equipment</li> </ul>	
3. Be able to implement systems and procedures to manage the	3.1 Implement systems and procedures for the movement, sorting and storage of waste in accordance with legislative	

movement, sorting and	requirements and organisational	
storage of waste.	procedures.	
	3.2 Implement systems and procedures that	
	comply with legislative requirements to	
	deal with wastes that need specific	
	handling.	
	3.3 Comply with legislative requirements	
	and organisational procedures for	
	recording and reporting risks to health,	
	safety or the environment.	
	3.4 Implement recording and information	
	systems for the sorting and storage of waste	
	in accordance with legislative requirements	
	and organisational procedures.	
	3.5 Ensure that personnel understand the	
	procedures relating to the movement,	
	sorting and storage of wastes and comply	
	with them.	
	3.6 Ensure that personnel have received	
	recognised training before any machinery,	
	plant or equipment is used.	
4. Be able to manage	4.1 Identify hazards and minimise risks to	
vehicles, plant and crews on	health, safety and the environment that	
sites which handle waste.	arise from the use of vehicles and plant on	
	the site.	
	4.2 Establish systems to control the	
	movement of vehicles and plant on site to	
	comply with health, safety and	
	organisational requirements.	
	4.3 Implement and enforce organisational	
	procedure to generate site rules for	
	vehicles, plant and crews on the site that	
	comply with legislative requirements and	
	organisational procedures.	

5. Be able to use, record and	5.1 Give instructions for moving, sorting and	
communicate information.	storage of waste in accordance with	
	organisational procedures.	
	5.2 Maintain records and provide	
	information for the moving, sorting and	
	storage of waste.	
	5.3 Inform site personnel of all procedures	
	for onsite activities to maintain the quality	
	of the organisation's work.	
	5.4 Monitor and review the work	
	programme and instructions to ensure	
	accuracy.	
	5.5 Communicate work instructions verbally	
	and in writing.	
	5.6 Check that employees have	
	understood work instructions.	
	5.7 Advise relevant people about	
	accidents, incidents, interruptions to work,	
	near hits and/or any situations that require	
	their attention.	
	5.8 Maintain a record of training for all staff	
	employed on the site.	
6. Be able to resolve problems	6.1 Recommend steps to rectify any staff	
which arise during or resulting	shortages, equipment deficiencies or	
from the movement, sorting	external factors that prevent the	
and storage of waste.	movement, sorting or storage of wastes.	
	6.2 Seek specialist advice to resolve	
	situations which arise outside own area of	
	responsibility.	
	6.3 Implement procedures for dealing with	
	spillages on site and ensure staff	
	compliance.	

## Manage the reception of non-hazardous waste (OC\$12)

Level: 3			Portfolio Ref	Comments
Learning Outcome	Assessment Criteria	Evidence Type	No

regulations, procedures	codes of practice and guidance			
and requirements for	applicable to the reception of non-			
managing waste	hazardous waste on the site.			
operations.	1.2. Describe the regulatory requirements			
	and organisational procedures for			
	dealing with unauthorised wastes.			
	1.3. Describe the organisational			
	procedures for managing work			
	activities on the site.			
	1.4. Describe the planning permission,			
	permit requirements and			
	environmental management system			
	(EMS) for the site.			
	1.5. Describe the waste inspection,			
	identification procedures and			
	handling requirements for the types of			
	non-hazardous waste received on			
	site.			
	1.6. Describe the uses, purposes and			
	processing requirements for			
	documents relating to the reception			
	and validation of non-hazardous			
	waste received on the site.			
	1.7. Describe the records required by			
	legislation and by organisational			
	procedures relating to the reception,			
	inspection and validation of non-			
	hazardous wastes.			

		1.8. Describe the organisational procedures for the delivery of non-	
2.	Understand the health, safety and environmental impacts associated with	hazardous waste to the site. 2.1. Describe the organisational environmental policy and procedures applicable to the site.	
	the reception of non- hazardous waste.	<ul> <li>2.2. Identify hazards associated with the reception of non-hazardous waste on site in relation to: <ul> <li>health and safety</li> </ul> </li> </ul>	
		environment 2.3. Describe risk analysis to minimise hazards to personnel and the environment for the whole workplace.	
		2.4. Identify risks to the environment and human health resulting from the reception, inspection and validation of non-hazardous wastes.	
		2.5. State the types of personal protective equipment (PPE) required and how they must be used, maintained and stored.	
3.	Be able to implement systems and procedures to manage the reception of non-hazardous waste.	3.1. Implement systems and procedures for the reception and validation of non-hazardous wastes in accordance with legislative and organisational requirements.	
		3.2. Implement systems and procedures that comply with legislative requirements to deal with non- hazardous wastes that need specific handling.	
		3.3. Implement systems and procedures that comply with legislative requirements for the rejection of unauthorised non-hazardous wastes.	

	3.4. Establish systems to control the
	movement of vehicles entering,
	moving around and leaving the site.
	3.5. Ensure personnel implement
	procedures and comply with
	legislative requirements for non-
	hazardous waste reception.
	3.6. Ensure all procedures for the
	reception of non-hazardous wastes
	comply with legislative requirements
	to maintain the quality of the
	organisation's work.
	3.7. Implement security arrangements to
	prevent the unauthorised delivery
	and removal of non-hazardous wastes
	on the site.
4. Be able to use and	4.1. Give instructions to customers and site
communicate	
information.	personnel about the procedures for
information.	receiving and validating non-
	hazardous waste.
	4.2. Maintain records and information
	systems relating to the reception,
	inspection and validation of non-
	hazardous wastes that meet
	legislative requirements.
	4.3. Check the work programme and
	instructions are accurate and
	complete.
	4.4. Communicate work instructions
	verbally and in writing.
	4.5. Check that employees have
	understood work instructions.
	4.6. Advise colleagues and managers
	about accidents, incidents,
	interruptions to work or any situations
	that require attention.

	4.7. Maintain a record of training for all staff employed on transfer, recovery, transport and disposal operations on site.	
	4.8. Notify customers and regulatory authorities of any breaches of the legislative requirements caused by the reception of unacceptable non- hazardous waste.	
5. Be able to resolve problems which arise from managing the reception of non-hazardous waste.	5.1. Take steps to rectify any staff shortages, equipment deficiencies or external factors that prevent the reception of non-hazardous wastes.	
	5.2. Seek expert advice to resolve situations which are outside own area of responsibility.	
	5.3. Advise relevant people of any breaches of security or other situations which require their attention.	

# Manage site operations for the anaerobic digestion of non-hazardous waste (OC\$32)

Level: 4			Portfolio Ref No	Comments
Learning Outcome	Assessment Criteria	Evidence Type	Pormolio ket No	
1. Understand the legislative	1.1. Describe the legislative requirements,			
and organisational	regulations, codes of practice and			
requirements for site	guidance applicable to the			
management of non-	anaerobic digestion of non-hazardous			
hazardous waste	waste from the site.			
anaerobic digestion	1.2. Describe the planning permission,			
operations.	permit requirements and			
	environmental management system			
	(EMS) for the site.			
	1.3. Describe waste inspection and			
	identification procedures.			
	1.4. Describe lifting and handling			
	requirements and techniques for the			
	types of waste received on the site.			
	1.5. Describe the storage requirements for			
	the non-hazardous waste types			
	handled on the site, and outputs			
	stored on site.			
	1.6. Describe the procedures and			
	documentation required for			
	anaerobic digestion of non-hazardous			
	waste to specific standards.			
	1.7. Describe the Control of Substances			
	Hazardous to Health (COSHH) and risk			
	assessment data for substances			
	received, handled and used on site.			
	1.8. Describe the procedures for dealing			
	with non-hazardous waste, out of			

	specification waste and any other residues from the process.	
	1.9. Explain how to interpret process	
	documentation and verify that the	
	information is accurate.	
2. Understand how to	2.1. Describe the organisational	
maintain adequate	procedures for non-hazardous waste	
resources for site	anaerobic digestion operations and	
operations.	the supply and use of resources	
	required.	
	2.2. Describe the technical skills needed	
	for non-hazardous waste anaerobic	
	digestion operations on site.	
	2.3. Explain how to ensure that relevant	
	staff have the required skills and	
	training.	
	2.4. Describe how to communicate work	
	instructions to personnel verbally and	
	in writing.	
	2.5. Explain why it is important to ensure	
	that staff understand instructions, and	
	how to ensure this is achieved.	
	2.6. State the types of personal protective	
	equipment (PPE) required and how	
	they must be used, maintained and	
	stored.	
	2.7. Describe the organisational	
	requirements and operational	
	procedures for all machinery, plant	
	and equipment used on the site.	
	2.8. Identify the types, functions and	
	limitations of handling equipment	
	available on the site.	
3. Understand how to	3.1. Explain the difference between a	
minimise risk to health,	formal and dynamic risk assessment.	

safety and the	3.2. Identify the hazards associated with	
environment.	the anaerobic digestion of non-	
crivitorintern:	hazardous waste on site in relation to:	
	<ul> <li>health and safety</li> </ul>	
	3.3. Describe the organisations	
	environmental policy and procedures.	
	3.4. Explain how risk assessment is used to	
	minimise hazards to personnel and the	
	environment.	
	3.5. Describe the procedures for dealing	
	with spillages and emissions.	
	3.6. Describe the procedures for dealing	
	with:	
	<ul> <li>DSEAR gas leaks</li> </ul>	
	• increased gas levels in confined	
	spaces	
	<ul> <li>other incidents</li> </ul>	
4. Be able to manage	4.1. Implement systems and procedures	
anaerobic digestion	for non-hazardous waste anaerobic	
treatment operations for	digestion processes in accordance	
non-hazardous waste.	with legislative and organisational	
	requirements.	
	4.2. Make arrangements for an adequate	
	supply of resources to carry out site	
	operations, including:	
	<ul> <li>materials</li> </ul>	
	<ul> <li>equipment</li> </ul>	
	<ul> <li>personnel</li> </ul>	
	information	
	4.3. Comply with legal and organisational	
	requirements for reporting risks to	
	health, safety and the environment.	
	4.4. Implement and maintain recording	
	and information systems specifically	
	relating to the non-hazardous waste	

	anaerobic digestion processes in accordance with legislative and organisational requirements.
	organisations work by ensuring that all procedures and processes are adhered to.
5. Be able to control work activities on waste sites.	5.1. Establish and oversee programmes of work which meet the legislative and organisational requirements required for non-hazardous waste anaerobic digestion operations.
	5.2. Implement site operating procedures that comply with health and safety and environmental protection requirements.
	5.3. Monitor and maintain systems to ensure that there are sufficient personnel with required skills and implement training programmes where required.
	5.4. Ensure that staff understand procedures and implement them in compliance with legislative and organisational requirements.
	5.5. Maintain safe systems of work and put in place controls to eliminate or reduce risk from hazards.
	5.6. Identify potential hazards and take steps to reduce risks to personnel and the environment, relating to wastes which:

	are difficult to handle     may have unacceptable or     unauthorised components     are likely to present     unexpected health problems 5.7. Monitor staff activity on non-     hazardous waste anaerobic digestion     sites to ensure they enhance or     maintain the quality of the     organisations work.
	5.8. Keep accurate records of non- hazardous waste treated and of the control parameters for the non- hazardous anaerobic digestion process.
6. Be able to resolve problems which may arise from non-hazardous waste anaerobic digestion operations.	6.1. Recommend steps to rectify any staff shortages, equipment deficiencies or external causes that prevent the anaerobic digestion of non-hazardous waste.
	6.2. Seek advice to resolve situations which are outside of the responsibility of the job role.
	6.3. Implement procedures for dealing with spillages on site and ensure that staff understand and follow prescribed procedures and incidents.
	6.4. Make arrangements for treatment or disposal for any batches of material that fail to meet the quality standards required.

## Manage transfer and disposal from anaerobic digestion operations (OCS63)

Level: 4		Evidence	Portfolio Ref	Comments
Learning Outcome	Assessment Criteria	Туре	No	
1. Understand the specific	1.1. Describe the biological treatment			
regulatory procedures	standards and regulatory			
and requirements for the	requirements to be met for			
transfer of outputs and	recognition of product status for			
disposal of residues from	outputs.			
biological anaerobic	1.2. Describe the legislative requirements,			
digestion treatment	regulations, codes of practice and			
operations.	guidance applicable to the transfer			
	and transport of wastes from the site.			
	1.3. Describe the planning permission,			
	permit requirements and environmental management system			
	(EMS) for the site.			
	1.4. Describe the legislative requirements			
	for the safe operation of machinery,			
	plant and equipment.			
	1.5. Describe the quality inspection,			
	identification procedures and the			
	handling requirements for the outputs			
	from the site.			
2. Understand the	2.1. Describe the organisational			
organisational	procedures for the management of			
procedures for the	personnel and work activities.			
transfer of outputs and	2.2. Describe the on-site procedures for			
disposal of residues from	the management of storage of the			
biological anaerobic	outputs and residues.			
digestion treatment	2.3. Describe the organisational			
operations.	procedures for transport operations			
	and the supply and use of the			
	transport resources required.			

		2.4.	Describe the procedures for dealing		
			with residues, out of specification		
			materials and any other rejects from		
			the process.		
		2.5.	Identify the storage and handling		
			implications for the output materials		
			produced on-site.		
		2.6.	Identify the types, functions and		
			limitations of waste handling		
			equipment available for use on the		
			site.		
		2.7.	Describe the lifting and handling		
			techniques that are suitable for the		
			outputs and residues that are being		
			transported from the site.		
3.	Know how to identify risks	3.1.	Identify hazards associated with		
	and manage work-		anaerobic digestion on site in relation		
	related hazards.		to both:		
			<ul> <li>health and safety</li> </ul>		
			environment		
		3.2.	Describe the control measures to		
			reduce or eliminate risks to safety,		
			health and the environment		
			associated with anaerobic digestion		
			on site.		
		3.3.	Describe how to use risk assessment		
			and analysis to minimise hazards to		
			personnel and the environment in the		
			workplace.		
		34	Describe the organisational		
		••••	procedures for dealing with spillages		
			and emissions.		
		3.5	State the types of personal protective		
		0.0.	equipment (PPE) required and how		
			they must be used, maintained and		
			stored.		
		1	3000		

	3.6. Describe legal and organisational requirements for recording and reporting risks to health, safety and the environment.	
4. Be able to implement management systems for anaerobic digestion operations.	<ul> <li>4.1. Implement systems and procedures for the transfer and transport of outputs from anaerobic digestion operations.</li> <li>4.2. Implement systems and procedures</li> </ul>	
	for the disposal of residues from anaerobic digestion operations. 4.3. Make arrangements for the supply of materials, equipment and information	
	needed to carry out loading and transport operations from the site.4.4. Make arrangements for the safe loading of outputs and residues from	
	anaerobic digestion operations.4.5. Apply management systems to ensure that all procedures and waste transfer and disposal processes are adhered to.	
5. Be able to manage information for the transfer of outputs and disposal of residues from anaerobic digestion	5.1. Ensure that transport documentation for all materials leaving the site is completed in order to comply with legislative and organisational requirements.	
processes.	5.2. Interpret process documentation and verify that the information is accurate and relates to the recovered wastes and residues.	
	5.3. Maintain records of all outputs and residues leaving the site in accordance with legislative and organisational requirements.	

		5.4. Implement and maintain a system to record testing and analysis data on outputs.
6.	Be able to resolve problems which arise from the transfer of outputs and disposal of residues from anaerobic digestion processes.	6.1. Take action to rectify any staff or transport shortages, equipment deficiencies or external causes that affect anaerobic digestion processes.
		failed to meet the prescribed       interview         standards for the site.       interview         6.5. Seek specialist advice to resolve       interview         situations which are outside the       interview         responsibility of the job role.       interview

### Glossary

**Dynamic risk assessment** refers to the continuous process of identifying hazards and assessing risk as they arise during work activities so operators can take action to eliminate or reduce risk, as well as monitor and review existing control measures.

Hazard refers to a potential source of harm or negative health effect.

Hazardous waste refers to waste that is dangerous or potentially harmful to our health or the environment. Hazardous wastes can be liquids, solids, gases, or sludges.

Health and safety refers to the regulations and procedures intended to prevent accident or injury.

Inert waste refers to waste that does not experience any significant physical, chemical or biological transformations e.g. it will not dissolve, burn, react, biodegrade or adversely affect other matter.

**Operator** refers to the person who has control over the operation of a regulated facility

Organisational procedures refer to a series of principles, rules and guidelines designed to ensure organisations reach their long-term goals.

**Personal protective equipment (PPE)** refers to protective clothing, helmets, goggles or other equipment designed to protect your body from harm.

**Risk** refers to a situation that exposes someone or something of value to danger.

**Risk assessment** refers to a systematic process you are required to carry out by law to evaluate potential risks that may be involved in an activity.

Training refers to an organised activity designed to teach a person a particular skill or behaviour to improve performance.

Waste refers to a material, substance or by-product eliminated or discarded as no longer useful or required after the completion of a process.

Waste hierarchy prioritises ways of dealing with waste based on how good they are for the environment.

Working at height refers to any place where a person could fall a distance liable to cause personal injury.

## **Qualification Structure**

To achieve this qualification, learners will need to complete six mandatory units:

#### **Mandatory Units**

Ofqual Code	Title	Level	Code
A/508/0756	Maintain health and safety in the waste and resource management industry	4	OCS01
F/508/0757	Manage the environmental impact of work activities	4	OCS02
F/508/0760	Manage the movement, sorting and storage of waste	4	OCS05
J/508/0887	Manage the reception of non-hazardous waste	3	OCS12
A/508/1003	Manage site operations for the anaerobic digestion of non-hazardous waste	4	OCS32
T/508/0979	Manage transfer and disposal from anaerobic digestion operations	4	OCS63

### Our purpose is to move the world beyond waste

Help us protect the environment by only printing this document if absolutely necessary and, where possible, please only print the pages you need.

This document has been designed to use minimal ink when printed.

## Qualifications

Together, we stand for a world beyond waste

#### More for professional life

Our mission is to unite, equip and mobilise our professional community to lead, influence and deliver the science, strategies, businesses and policies for the sustainable management of resources and waste.
